

Beverly Mock, PhD

Laboratory of Cancer Biology and Genetics
NIH Campus, Bethesda

Words to live by...

*I like the African proverb,
"If you want to go fast go alone. If you want to go far go together."*

What is your favorite thing about working at NCI?

The freedom to work alongside a diverse population of trainees and employees to pursue our research goals to contribute to cancer prevention and treatment.

In my spare time, I enjoy...

I like to run, ride my bicycle, take hikes and read books.

My favorite traditions/holidays...

Thanksgiving is my favorite holiday because our family goes out of our way to spend it together. It is the only time of year when we are together in one place. Last year we didn't get to do this and I'm really looking forward to it this year.
