

Lindsay Morton, PhD

Radiation Epidemiology Branch
NCI Shady Grove

Words to live by...

"I want to beg you, as much as I can, dear sir, to be patient toward all that is unsolved in your heart and to try to love the questions themselves like locked rooms and like books that are written in a very foreign tongue. Do not now seek the answers, which cannot be given you because you would not be able to live them. And the point is, to live everything. Live the questions now. Perhaps you will then gradually, without noticing it, live along some distant day into the answer." –Letters to a Young Poet by Rainer Maria Rilke

What is your favorite thing about working at NCI?

I love working in a place that champions the conduct of high-risk, high-reward research that will truly impact the lives of cancer patients. The highly collaborative environment and presence of so many dynamic people – from the trainees through the leadership – working towards shared goals make it a real privilege to work at the NCI.

In my spare time, I enjoy...

I enjoy playing outside in just about any way possible with my husband and two daughters. My favorite activities involve water (swimming, kayaking, snorkeling, scuba diving, sailing). I also love to cook all different kinds of foods.

My favorite traditions/holidays...

My favorite holiday traditions surround gathering family and friends to share delicious meals.
