

## Jung-Hyun Park, PhD

Experimental Immunology Branch  
NIH Campus, Bethesda

### Words to live by...

*"Do what you can, with what you have, where you are"*  
-Theodore Roosevelt

### What is your favorite thing about working at NCI?

A diverse community with people from all around the world who speak different languages, dress differently, and prefer different food - but who are gathered together because of their love in science.

### In my spare time, I enjoy...

Trying to learn a new music instrument, and then failing after a few months. The good thing is that there are still a bunch of instruments left that I can try to learn.

### My favorite traditions/holidays...

The Lunar New Year's day! It is on a different day every year which is exciting.
