

Kayla Titialii-Torres, PhD

Postdoctoral Fellow
NCI Frederick

Education

Ph.D., Biology, University of Kentucky
B.S., Zoology, Washington State University

Scientific Interests

- Developmental Biology
- Biochemistry
- Regeneration

I applied to iCURE because...

Throughout undergraduate and graduate school I was a part of amazing organizations that centered on cohorts that build community together such as McNair and LSAMP. At NIH, I was hoping to find something similar, when the PI I was interviewing with suggested iCURE. It is a great program to help find community at NIH as well as an amazing funding opportunity.

My favorite traditions/holidays...

Halloween!

My hometown is...

Seattle, WA, USA

In my spare time, I enjoy...

I absolutely love hiking and paddle boarding! Road trips are also a favorite activity, I would rather drive to see all the sites along the way!

A few of my favorite things...

- Favorite food: Eggs Benedict
- Favorite place: Cypress Mountain
- Favorite hobby: Making clay earrings
